

AUDIO DOOR ENTRY SYSTEM

HANDS-FREE OPERATION DIGITAL QUALITY

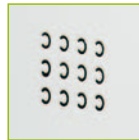

The **iLOFT** telephone is a compact and extra slim audio door entry system. Enables communication with the outdoor panel in hands-free mode.

Built-in digital audio technology ensures high quality and interference-free bidirectional way communication.

Equipment manufactured in ABS plastic with ultraviolet protection and "mirror polish" finish for easy cleaning.

SINGULAR DETAILS

Audio digital technology.

Pushbuttons to initiate communication and open the door.

Linear volume control (conversation and call)

LED signalling
Blue: in communication.
Red: volume off.

With built-in **additional functions button (F1)**: stair light, 2nd door outdoor opening, panic call, etc.

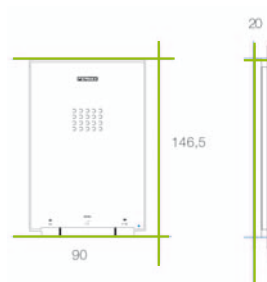

HANDS-FREE OPERATION

Maximum simplicity and convenience.

When a call is received from the panel, a blue coloured LED on the  button blinks. To initiate a conversation, simply press  once and you can talk to the visitor with no need for a handset.

Press  to open the door.

Communication ends at 90 seconds or when  is pressed again.
