### DIGITAL VIDEO DOOR ENTRY

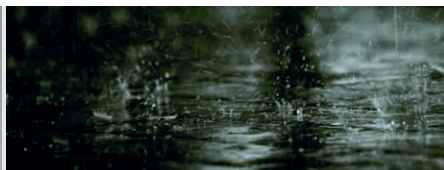

### THE MARINE RANGE IS COMPLETED WITH THE ARRIVAL OF THE NEW MARINE PANEL ADAPTED TO HANDICAPPED USERS

Manufactured in stainless steel with a new aesthetic, this video digital panel integrates 4 luminous symbols making the access to persons with any kind of disability easier.

# A PANEL COMPLETELY ADAPTED FOR HANDICAPPED PERSONS

The MARINE vandal-proof range has been designed to withstand any impact (IPK549) as well as guaranteeing maximum resistance in adverse weather conditions.

An informative screen with 4 icons that light up to show the equipment status at all times.

Bell

Conversation

Door open

Busy channel

VDS system

## 2. Digital keypad

The digital keypad allows viewing the resident's names and apartment codes due to its similarity to a telephone directory. The visitor receives information regarding the communication status.

The communication may be initiated by entering the apartment code and pressing the  key.

## 5. Installation

When installing the Marine digital panel, it is possible to program the door opening duration to adapt it to persons with reduced mobility. It is recommended to install the panel at a maximum distance of 130cm from the floor to the highest pushbutton. Aerial cameras may be installed to obtain an additional view of the visitor.

**Combination with other FERMAX systems:** The simplified BUS2 panel may be combined with the MDS system, responding to all market necessities.

## 3. Back lighted keypad

The panel integrates a back lighted keypad allowing to view the key numbers in poor light conditions.

A mark in the key number  guides persons with visual difficulties along the disposition of the keypad.

## 6. At home

The handicap range includes as well, adapted solutions for home interiors.

The iLOFT monitor, manufactured in ABS plastic, includes an induction loop compatible with hearing aid devices allowing to improve the conversation volume for persons wearing these devices.

Panel (S4):  
150(H)x485(V)mm  
Flush box (S4):  
130(H)x465(V)x70(D)mm

Available in all technologies.

## 1. Luminous symbols

The panel indicates the user the communication status between the outdoor panel and the home: Bell, conversation, door open and channel busy. These symbols supply the visitor with two types of information: visual and audible. The panel is then much more intuitive and simple to use, making the access much more easier.

## 4. Voice message

Includes built-in powerful high-performance amplifier with volume control to adjust the conversation level. A synthesized message is emitted to indicate that the door is open, making its use easier for people with visual disabilities.
